Body Worn Camera Solution Proposal

For:

Cortland Police Department

Date: Tuesday, 17 May 2016

The Solution

Reveal has proposed its RS2-X2 series camera which has been proven in the field of many years by thousands of law enforcement officials and is the backbone of the proposed solution. The RS2-X2 is the only camera on the market proven to increase officer safety through public behaviour modification due to its front facing mirroring screen. In addition the RS2-X2 provides the utmost in mounting and non-body worn flexibility by nature of its position able lens head. Whether its head or chest mounted, with the RS2-X2, you are always guaranteed to capture the officer's point of view. The RS2-X2 provides for 170 degree horizontal and 70 degree vertical field of view in addition to its pensionable lens head.

Included in this proposal are mounting solutions custom tailored for your department's needs. Reveal offers a variety of mounting solutions to fit virtually every need from helmet to jacket or suit attire. To make it easy to don or doff cameras, our mounting solutions use the KlickFast stud mount solution and with a quick rotation the camera can be removed.

Taking a step further, the RS2-X2 makes upload and camera management a breeze with our unattended upload process. Each camera uploads its video through the RS2-X2 Dock, or Smart Dock (depending on solution design) simply by dropping the camera in its cradle. No other human intervention is involved. Real time details are displayed on each camera which notifies users which cameras are assigned to which officers and indicates charge and upload status. Each dock provide full video upload automation and configration control from the administrators level. Scalable, we have available docking options from 6 units to eighten...so no matter what the needs are, Reveal is sure to answer them.

The Solution Continued.....

Reveal's feature rich Digital Evidence Management System (DEMS), provides a one stop shop for the upload, storage, retrieval and management of all body worn video. DEMs was designed to be flexible guards against policy obsolescence. We all know operations and policies change so DEMS was designed to be highly configurable so your department can grow with changing times.

DEMS provides a robust search feature which includes searches by date, time, camera, officer, category and any and all meta-data that's included with each video file. Within three mouse clicks your video located in seconds amongst thousands of video files. Videos can then be viewed through our browser based solution and meta-data can be updated (based on roles and permissions.

IT personnel will love the fact that DEMS (DEMSWeb, DEMS is also available in standalone installation configuration) fully supports Active Directory which means an easy deployment and less resources to support over its life cycle. In addition, DEMS is web based so it does not require local application installation support or updates...just a browser is all that's required. For those needing copies of videos, DEMS allows for multiple file exports in various formats...CD, file, MP4...point click and export.

Product Data Sheets: RS2-X2 Series

RS2X2

With you on the front line

Award-winning, compact, tough body worn camera with top-end features.

RS2X2 RS2X2L

Comes with DEMS

- Natural deterrent with front-facing screen
- Quick and easy one-touch record
- Accurate recording with articulated camera head
- Maximum security with full AES encryption

Main specifications

Records: Video and Audio (Audio optional)	**Encryption:** AES 256-bit
Recording resolution: 1080p30, 720p, 480p (WVGA)	**Battery:** Lithium polymer (internal)
Recording rate: 25 or 30 frames per second	**Articulation:** 305° horizontal, 173.5° vertical
Video encoding: H.264	**Protection:** IP54
Audio encoding: Advanced Audio Coding (AAC)	**Certifications:** FCC & CE
Recording format: .mov or .mp4	**Connectivity:** MicroUSB, USB 2.0
Screen: 2" color LCD	**Wide field of view:** 100° horizontal, 55° vertical
On-screen display: time, date, memory, resolution, recording speed, battery life, recording space available	**Temperature range:** 14°F to 122°F
Audio alarms: on/off, record, stop record, low battery, low memory	**Warranty:** 12 month manufacturer's warranty

Model specifications

Model	Memory (Internal)	Recording capacity (hh:mm)	480p	720p	1080p	Battery life* (hh:mm) 480p	720p	1080p	Charge time	Dimensions	Weight
RS2-X2	8GB	8GB:	7:57	2:59	2:20	3:50	3:35	3:10	3 hrs	3.9" x 2.2" x 1" (H/W/D)	4.6 oz
RS2-X2L	8GB or 32GB	8GB:	7:57	2:59	2:20	8:10	6:50	6:25	8 hrs	3.9" x 2.2" x 1.2" (H/W/D)	5.2 oz
		32GB (optional):	34:14	12:56	10:05						

*Battery life is estimated when continuous recording with the screen on.

REVEAL

RS2-X2 Docks

Smartdock

With you on the front line

Complete standalone system with all the features of DEMS, without the need for an external PC.

Comes with DEMS

- Small footprint integrated docking station for managing video evidence
- Automatically charges Reveal cameras and uploads videos
- Comes with embedded DEMS
- Model variations to support 18 RS2-X2 or RS2-X2L cameras

Features	Specifications
Can operate in conjunction with Standalone, Enterprise, Hybrid or Cloud based DEMS	**Hardware:** Intel based PC
Standalone small form factor for use in space limited environments	**Software:** Windows 8.1 with embedded DEMS
Connects to local area network	**USB Ports:** 18 dedicated to Reveal cameras with custom docking ports, plus 2 standard USB ports
Supports local keyboard/mouse and display for configuration or DEMS use	**Display:** HDMI out (optional)
High reliability power supply and components for 24/7 continuous operation	**Keyboard and Mouse:** USB (optional)
Works with Windows FAT, FAT32, NTFS file systems for external sharing	**Storage:** 1TB SATA Internal Hard Disk 5400RPM
Neat and tidy with no loose cables	**Network Connectivity:** RJ45 (1Gigabit Ethernet)
Compact design	**AC Power:** 120/240V 50/60Hz
