Proposal

We propose to donate to the Town of Cortland for its use and public enjoyment a 50' x 80' outdoor ice skating rink made by Iron Sleek to be located at Suppland Park.

Details of Ice Rink

The Ice Rink kit will include:

48 – Iron Sleek Brackets

8 – Iron Sleek Corner Brackets

155' x 85" 6 mil All White Liner

16 – 2" x 12" x10' lumber

This is made by a company out of Itasca, Sleek Iron, if you would like to see more information about it please view their website at Sleekiron.com

Installation Details

The ice rink will be constructed by volunteers in early November and will be taken down in February, weather permitting.

Are there any qualifications for volunteers, such as age? My thoughts were to have a signup sheet in a couple of places and have them watch the installation video that is on you tube for the ice rink, made by the company that produced it. Also could we set up a non-permanent fire pit to keep the volunteers warm? (see attachment B) I would like to provide some sort of refreshments for the volunteers such as hot chocolate and maybe some snacks, would I need a permit for this? My estimate for the construction would 11 people could get it done in a very timely fashion.

Once the construction of the rink is complete, we will then fill the ice rink with water using the Vactor truck from All Around Pumping.

When does the well close at the park? Can we get water from the city?

The bleachers will be moved closer to the rink, so people can use them to put on skates or to watch others. This is to be done by the town.

Ice Rink Storage

The ice rink is to be stored by the Town of Cortland in a dry inside location, TBD.

Ice Rink Maintenance

The ice rink will be maintained at least (1) time per week while in operation by All Around Pumping Company. The maintenance will be a new layer of water applied to it to keep the ice smooth and to melt snow. Snow removal is not included in this proposal as a regular maintenance.

We will also provide signage to indicate if the ice rink is open or closed (see attachment A).

Who would be responsible for changing the sign?

We will also provide a new liner for the ice rink if needed for the next 5 years.

Questions

1.) Would there be a sign for the ice rink, maybe sell a few advertising spots to help pay for some winter activities? This would be a temporary sign.
2.) Would we do winter activities, like Polar Palooza in DeKalb?
3.) Would we offer skate rental for special dates?
4.) We could put up benches around the rink so people could have a dedication or memorial (in the future)
5.) I would love to put up boards for the back so hockey could be played there.
6.) Insurance?
