Water and Wastewater Department

The water and wastewater department is requesting approval on purchasing a 2016 Ford F-350 Utility Truck with Snowplow. This truck would replace the 1995 Chevy that is currently in use. Cab/chassis would be built by Ford, Sauber Manf. would upfit the chassis with a fiberglass utility box, and 8'-10' Western Wide-Out plow would be installed on the truck. Complete build out time would be approx. 120 days. My recommendation is to purchase the truck from Gjovik Ford for $57,637.84. Funds to be taken from FY16 approved budget line item 06-7300-812 Sewer Capital Outlay Equipment.

Example of Truck

Specifications were developed and RFP's were mailed to 26 area Ford dealers. The top three proposals are listed below.

Gjovik Ford $57,637.84

Zimmerman Ford $58,262.00

Currie Motors $58,378.00
