

## CORTLAND HISTORY DOG

The face of the Huskie is that of a Timber Wolf as well as the tail. This speaks to the wild, pioneering origins of the Town. The Huskie fur texture gradually makes its way for the stars and stripes going down the front legs. This represents patriotism and remembrance of those who have served.

The hind quarters are a pattern of pampas grass seeds at the top and stalks with leaves at the bottom.

Side one has the settler's date as well as the date the Town was established. A train reflects the railroad history and the crops and fields represent the agriculture background. Below that is a photo of "Herb's Garage Truck." This represents the labor of the Town.

Side two contains the Town Seal and a vignette of "Schmidt Bros. General Store." This represents the retailers of the Town.
